Specification

1. Please note, on page 6, line 11, it appears that "assemble" should be "assembled". Also, on page 14, line 17, it appears that the connector cap is referenced by "44" not "34". Finally, on page 21, lines 7 and 9, it appear that "192" should be "92".

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 12, 13 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by van der Heijden '364.

Van der Heijden shows a pump housing 1; liquid chamber 9; air chamber 4; plunger 11; interior discharge passage 15; liquid piston 10; air piston 5; open and closed vent positions seen in Figures 1 and 2 dependent on the axial position of the air piston; the vent path extending up to exit 47; the air and liquid plungers have limited axial movement as seen in the figures; and projection 43.

Allowable Subject Matter

4. Claims 3-11, 14-18 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
